

## STATEMENT OF NEED

Advances in medical imaging continue to occur quite rapidly, making the clinical practice of radiology extremely demanding. The information presented in this course familiarizes the participant with newly emerging material and provides opportunities to discuss and exchange ideas with the faculty. The program was conceived, developed, and structured as a result of the input from attendees of previous CME meetings and the need perceived by our faculty.

## TARGET AUDIENCE

This educational activity has been designed to meet the needs of radiologists in general diagnostic practice who are determining which radiologic tests to order and how to evaluate and manage their patients.

## LEARNING OBJECTIVES

At the conclusion of this educational activity, learners should be able to:

1. Review breast MRI interpretation and breast MRI biopsy indications and techniques.
2. Describe spinal cord abnormalities and extramedullary processes.
3. Identify utility and process of adding US contrast to your practice.
4. Add clinical value for your colleagues in regards to diagnosis and treatment of uterine fibroids and cervical cancer.
5. Review ankle MRI fundamentals and beyond.
6. Recognize thoracic trauma and mimics of thoracic malignancy.

## ELEMENTS OF COMPETENCE

This CE activity has been designed to change learner competence and focuses on the American Board of Medical Specialties' areas of medical knowledge, patient care and procedural skills, and practice-based learning and improvement.

## BIG SKY, MONTANA

Big Sky is one of the finest ski resorts in the northwest. Nestled between three major mountain ranges, Big Sky offers 5,800 acres of alpine skiing, 85 miles of groomed cross country ski trails, ice skating, sleigh rides and numerous fine restaurants. Also, 400-inch average snowfalls and extensive snowmaking provide the best possible skiing conditions. Big Sky boasts beginning, intermediate, and advanced runs, with Lone Mountain topping off at 11,166 feet. Yellowstone National Park is within easy driving distance, providing opportunities to explore via snowmobile, snow coach, or cross country skiing. Enjoy viewing herds of bison, geysers, and numerous hot springs. Other local activities include snowshoeing, sleigh rides, and dogsledding. The Big Sky location offers something for everyone.
