SUMMARY BRIEF
Clinical Informatics (CLN102)

Provided by the **University of Wisconsin–Madison Interprofessional Continuing Education Partnership (ICEP)** and **Epic**.

Statement of Need and Purpose
Healthcare is changing quickly with the electronic health record (EHR) matching this rapid pace. Clinical Informaticists need to continually increase their competence and skills to build, modify, and create efficiencies within the EHR, as well as understand the implications of their decisions on clinicians and patient safety. They also need the ability to work effectively among the interprofessional team and be liaisons between information technology and clinical operations. To be effective in in this role and increase clinician satisfaction, Clinical Informaticists need to promote excellent communication among the healthcare team and improve clinical workflows within the EHR.

Elements of Competence
This CE activity has been designed to change learner competence and focuses on the American Board of Medical Specialties area of systems-based practice, Institute of Medicine areas of patient-centered care, working in interdisciplinary teams, and using information technology, and the Interprofessional and Nursing areas of roles/responsibilities and interprofessional communication.

Intended Audience
This program is designed to meet the needs of physician and nurse informaticists, as well as others who are using EpicCare Ambulatory, EpicCare ASAP and EpicCare Inpatient in their daily practice.

Learning Objectives
Following this training, learners will be able to:
- Demonstrate skills to help improve clinical workflows and increase clinician satisfaction
- Describe strategies to increase effectiveness as a liaison between IT and operations
- Explain the value and evolving role of the clinical informaticist in maximizing communication among members of the interprofessional health care team
