

Clinical Informatics (CLN 102)

Voyager Hall – Verona, Wisconsin
Tuesday, January 21 through Friday, January 24, 2020

Provided by the **University of Wisconsin–Madison Interprofessional Continuing Education Partnership (ICEP)** and **Epic**.

Statement of Need and Purpose

Clinical informaticists make key decisions during electronic health record (EHR) implementation and maintenance process, and they need to understand the implications of those decisions on clinicians and patient safety. To lead the maintenance of an electronic health record, clinical informaticists need to understand key workflows, the language to support key tools, and how to manage the health of a patient population through reports so they can effectively serve as liaisons and builders. The EHR must be designed to support team-based care.

The purpose of this training is to provide an overview of the integrated clinical health system and key functionality commonly used by clinicians. We will review the process and terminology of building a variety of integrated EpicCare tools, including areas that drive reporting.

Elements of Competence

This CE activity has been designed to change learner competence and focuses on the American Board of Medical Specialties area of systems-based practice, Institute of Medicine areas of patient-centered care, working in interdisciplinary teams, and using information technology, and the Interprofessional and Nursing areas of roles/responsibilities and interprofessional communication.

Intended Audience

This program is designed to meet the needs of clinicians in the role of informatics who are using EpicCare Ambulatory, EpicCare ED and EpicCare Inpatient in their daily practice.

Learning Objectives

Following this training, learners will be able to:

- Demonstrate skills to help improve clinical workflows and increase clinician satisfaction
- Describe strategies to increase effectiveness as a liaison between IT and operations
- Explain the value and evolving role of the clinical informaticist in maximizing communication among members of the interprofessional health care team
